

# Mitchell Carter

I am a Full Stack developer with specialties in Node, React, and Typescript. I have utilized Vue3 and Pinia in my most recent position. In my most recent personal projects they have been built utilizing node, react in typescript and redux. I am currently learning Python to delve deeper into Data Analytics and Machine Learning.

## EDUCATION

### WGU, North Carolina — *B.S. Computer Science*

Graduation - June 2025

## WORK EXPERIENCE

### Halls Of Glory LLC, NC – *Junior Software Engineer*

August 2023 - PRESENT

- Spearheaded the optimization of legacy code to enhance performance. Included updating deprecated functions and state management from Vuex to Pinia within a feathers.js backend. As well as migrating our apps from Vue 2 to Vue 3.
- Responsible for deploying applications to Digital Ocean droplets, managing DevOps processes through GitLab, and utilizing GitLab runners for CI/CD operations..
- Developed custom OAuth 2.0 login workflows for Facebook and Twitter, enhancing user authentication processes for our applications in Typescript.

## SKILLS

- Javascript
- Typescript
- HTML5/CSS4
- REACT
- REDUX
- VUE3
- PINIA
- Restful API
- Python
- MongoDB
- SQL
- GIT
- TAILWIND
- Restful API
- Devops

## EDUCATION

### WGU, North Carolina — *B.S. Computer Science*

Graduation - June 2025

## PROJECT EXPERIENCE

### React: Forecast Emulator — *Weather Forecast Site*

- A React weather forecast web app enabling city searches and viewing current and 6-day forecasts
- Implemented OpenWeatherMap API calls in React to retrieve real-time weather data for searched locations

### React/Redux: Daily Smarty Clone — *Blog Platform*

- React UI blog platform allowing editors to create, edit, and publish posts
- Leveraged Redux for central state management and data persistence.
